(54) OPTICAL RECORDING MEDIUM, RECORDER AND RECORDING METHOD

(57) Abstract

PROBLEM TO BE SOLVED: To form the visible visual sensation image on an optical recording medium.

SOLUTION: A laser beam emitting part 10 for irradiating an optical recording medium 25 with the laser beam and a visual sensation image conversion part 24 for converting the visual sensation image are furnished for realizing this subject in such a manner that the visual sensation image converted by the visual sensation image conversion part 24 is supplied to the laser beam emitting part 10, and the visual sensation image having the visible size is formed with a plurality of recording marks on the optional position or the specified position of the optical recording medium 25 by the laser beam emitting part 10.
